This book was put together with a dual purpose in mind, and the result is the finest collection of deals since Pietro Forquet's *Bridge With The Blue Team*. First, you can read *Bridge Magicians* as a text that will provide insight into the skill that is involved in expert-level declarer play; you'll get the chance to follow declarer's reasoning, and make your own decision at the critical points on each deal. Perhaps some of the brilliant flights of imagination in these pages will inspire you to greater heights yourself! Second, you can approach this book simply as a feast of great bridge: sit back and marvel at the incredible virtuosity that the Polish stars display on these deals. By the time you have finished, you will surely agree, that the title is no exaggeration: these players truly are 'bridge magicians'!

**MARK HORTON** is an international bridge journalist and player, and editor of BRIDGE magazine in the UK. His previous books include *For Love or Money* (with Brian Senior).

**RADOSLAW KIELBASINSKI** is a bridge official, journalist and translator. He is President of the Polish Bridge Union.
